Election/Restrictions

Pursuant to 35 U.S.C. 121 and 37 C.F.R. 1.141, the amino acid sequence recited in claims 33-40 are subject to restriction. Claims 33-40 recite amino acid sequences according to SEQ ID NO: 6-14, and 49-50. Each of these sequences is considered to be structurally independent and distinct, because although they share some similar residues, the overall sequence of each of these amino acid sequences is different and would require a separate and independent search of the prior art. Additionally, a search of all the amino acid sequences recited in the instant claims presents an undue burden on the Patent and Trademark Office to search and examine all of the recited sequences. In view of the foregoing, applicants are required to elect up to 1 of the claimed amino acid sequences to be searched with the claimed invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
